

Use Case Flow

Cast Vote in Monthly Poll

Identification

Field	Value
Use case	Cast Vote in Monthly Poll
ID	UC-08
Implements	FR-005
Includes	UC-09 Verify Duplicate Vote
Supports	NFR-001
Primary actor	Club Member
Supporting actor	System identity and vote-log verification

Preconditions

- 1 The club member has an authenticated, active session.
- 2 A monthly poll is open and the current time is before its deadline.
- 3 The poll contains at least two candidate books.

Trigger

The club member selects a candidate book and confirms the vote.

Main Success Scenario

- 1 The club member opens the current monthly poll.
- 2 The system displays the candidate books and voting deadline.
- 3 The member selects one candidate.
- 4 The member confirms the submission.
- 5 The system verifies that the member has not already voted in this poll.
- 6 The system records the member-and-poll vote atomically.
- 7 The system increments the selected candidate tally.
- 8 The system displays the updated result and confirms that the vote was recorded.
- 9 The use case ends successfully.

Alternate Flow A1 Duplicate Vote

This flow begins at main step 5.

- 1 The system finds an existing vote for the same member and poll.
- 2 The system rejects the new submission.
- 3 The existing vote and every candidate tally remain unchanged.
- 4 The system displays a message stating that a vote has already been recorded for the account.
- 5 The use case ends without recording another vote.

Alternate Flow A2 Poll Closes Before Confirmation

This flow begins at main step 4.

- 1 The system rechecks the voting deadline.
- 2 If the deadline has passed, the system does not record the vote.
- 3 The system displays the closed status and final results when permitted.

Exception Flow E1 Recording Failure

This flow begins at main step 6.

- 1 The data store fails to complete the vote transaction.
- 2 The system rolls back the transaction, preventing a partial vote or tally update.
- 3 The system logs the failure without exposing sensitive account information.
- 4 The system displays a temporary service-failure message.

Postconditions

Success

- Exactly one vote is associated with the member and poll.
- The selected candidate tally includes the vote.
- The result displayed to authorized users reflects the committed record.

Failure

- No additional vote is recorded.
- Existing votes and tallies remain unchanged.
